

# Proven Stoett Quality Built into PanoramaPlus

PanoramaPlus combines Stoett's proven spring retraction technology with durable construction and effortless manual operation for dependable, everyday use.

## Simple Operation. Proven Durability.

Our proprietary spring-retraction system provides a smooth, controlled pull-down experience that is easy for homeowners to understand and use. Fewer components mean dependable performance, fewer service concerns, and long-term value.

### EASY TO USE

A smooth pull-down motion and simple manual operation make the product intuitive from the first use.

### QUALITY YOU CAN FEEL

Consistent spring tension and solid construction communicate Stoett quality every time the screen is used.

### BUILT FOR DURABILITY

No motor, battery, wiring, or control board means fewer components to fail, replace, or troubleshoot.

### LOWER SERVICE BURDEN

Straightforward mechanics help reduce motor-related callbacks and simplify long-term ownership.

## A clear fit for the everyday residential opening

Best suited for: patios, porches, garages, and similar openings where insect protection and airflow are the priorities.

Dealer advantage: a compact, budget-friendly product with direct-screw installation and a straightforward customer story.

## How to position PanoramaPlus

1.

Confirm the fit Use PanoramaPlus for insect-screen openings up to 9' W x 10' H where a compact 3" x 3" housing makes sense.

2.

Ask what they value If the customer wants reliable retraction without paying for automation, PanoramaPlus is the natural starting point.

3.

Explain the advantage They get the proven Stoett spring system, direct-screw installation, and no motor, wiring, battery, or controls.

## PanoramaPlus vs. Motorized Option

| Decision point  | PanoramaPlus                                                         | Motorized alternative                                                      |
|-----------------|----------------------------------------------------------------------|----------------------------------------------------------------------------|
| How it retracts | Proprietary manual spring system                                     | Motor-driven system with electronic controls                               |
| Power needed    | None                                                                 | Wiring, an outlet, or a rechargeable power source may be required          |
| Installation    | Direct-screw installation with no electrical work                    | May require power planning, wiring, setup, or charging                     |
| Service needs   | No motor, battery, or control board to diagnose or replace           | Motor and electronic components may require troubleshooting or replacement |
| Best fit        | Residential insect-screen openings where simplicity and value matter | Customers who specifically want automation or need it for the opening size |

## Stoett's Retractable Screen Line-Up

| Product          | Maximum size  | Screen options                         | Operation           | Housing       |
|------------------|---------------|----------------------------------------|---------------------|---------------|
| PanoramaPlus     | 10' W x 9' H  | Insect screen                          | Manual only         | 3" x 3"       |
| PanoramaUltra S1 | 13' W x 11' H | Insect, solar, privacy                 | Manual or motorized | 4.41" x 4.33" |
| PanoramaUltra S2 | 20' W x 12' H | Insect, solar, privacy, vinyl          | Manual or motorized | 6" x 6"       |
| PanoramaUltra S3 | 24' W x 16' H | Insect, solar, privacy, vinyl or combo | Manual or motorized | 8" x 8"       |
